Marked Card Instructions

There is no setup needed to make these cards make your game of poker winning streak!
All you need to do, is shuffle the cards, deal them out and play as normal.

To read the cards look at the top left corner of the card, there is an 8 pointed star, The contents of this allow the card be read.

To read the suit look at 4 small circles in the star design. There is one that is not filled in, signifying the suit of the card.

S = Spades
C = Clubs
H = Heart
D = Diamond

To read the Value of Card you need to now look at the smaller 12 pointed star. There is one point that is different to the others, and this lets you see what card it is. The easiest way to read this is to think of the points as a clock.

1 = Ace 10 = Ten
2 = 2 11 = Jack
3 = 3 12 = Queen

There is no pointer for the King, so when there is no pointer showing the card is a King.
